Cybersecurity & Risk Management

Reduce risks without sacrificing employee productivity

Delivering cybersecurity that protects stakeholders without hindering productivity is not easy. It's harder when CISOs must also anticipate emerging threats while ensuring regulatory compliance. Blue Mantis Cybersecurity and Risk Management provides turnkey business resilience to protect your data, assets, and reputation.

Security for your multi-cloud IT

According to the Cloud Security Alliance, the top challenge for keeping cloud IT secure is insufficient cloud security expertise. Blue Mantis delivers comprehensive protection for multi-cloud IT environments. Our experts use a zero-trust framework to assess, design, implement, and harden your security across all major public and private cloud providers.

Enable secure hybrid workforces

Cybercriminals find your weakest points to attack. Blue Mantis helps CISOs transform their legacy networks and systems with zero-trust security for the entire IT stack. Deploy robust and consistent security to protect your remote and distributed workforce using the cloud. Trust us to prepare for the inevitable cyberattack with business continuity planning and incident response for a quick recovery.

Stay ahead of the compliance curve

Blue Mantis Governance, Risk & Compliance solutions empower businesses with agility to comply with ever-changing security regulations and policies. We provide risk assessments, policy development, extensive vulnerability scanning/penetration testing using the Penetration Testing Execution Standard (PTES) methodology, and security training —along with "CxO as a Service" solutions for proven executive-level cybersecurity leadership and IT support at scale for companies without a dedicated CISO.

Top verticals for security clients

Finance & Banking

Healthcare & Life Sciences

Business Services

Retail

Manufacturing

Public Sector

Protect your data, assets, and reputation

Cloud Security

Mitigate cybersecurity threats in AWS, Azure, and hundreds of other cloud-native services

Network & Systems Security

Defend against network and system intrusions without sacrificing productivity

Risk & Compliance

Detect and defeat business-ending security risks while remaining in compliance with all regulations

Business Resilience

Integrate availability and resiliency into all cloud, on-prem, and hybrid IT environments

”

“It's all about security today and I have a small IT team. But I can call on Blue Mantis, whether it's for security, cloud, or infrastructure, to supplement my team.”
