Affordable Business Phone Plans

Create customer connections

A recent survey sponsored by Google found that 94% of mobile users wanted to call a business after a web search—and 47% of respondents looked for another brand if no phone number was available. Connecting with customers on their phones, whether a voice call or text message, is a must have for any business.

Blue Mantis partnered with Peerless Networks, a global VoIP provider, to empower organizations with secure and affordable telephony capabilities so crucial to modern business.

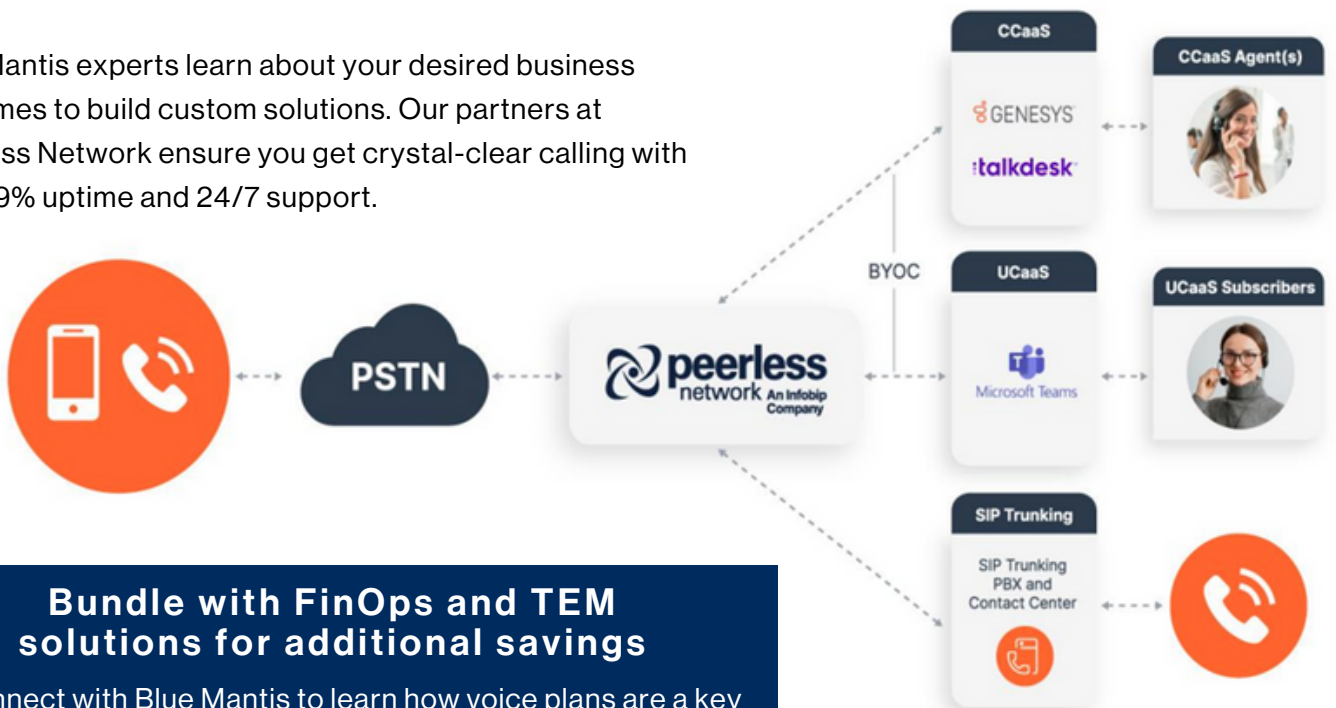

Unify your business communications

Whether you want to provision a toll-free number for inbound sales, voice and texting services for your omnichannel contact center, or integrate an existing on-prem or a brand-new cloud PBX with your Microsoft Teams app, Blue Mantis delivers the telephony solution you need based on your budget.

Blue Mantis experts learn about your desired business outcomes to build custom solutions. Our partners at Peerless Network ensure you get crystal-clear calling with 99.999% uptime and 24/7 support.
