Backup & Recovery

Powered by veeAM

- Build business resilience against cyberattacks and disasters with immutable managed backups

- Protect your entire IT environment across on-premises, remote, private cloud, public cloud, and mobile assets

- Restore critical data from encrypted secure cloud storage in minutes to ensure your employees stay productive

Restore critical data after ransomware and other disasters

In 2023, ransomware attacks increased 95.4% year-over-year. Criminals now target data backups to prevent recovery after attacks and increasing their leverage over victims.

Blue Mantis Backup and Recovery solutions empower you to create secure, immutable backups for your business data with managed storage to preserve backup integrity.

Secure cloud-to-cloud backups

Blue Mantis Backup and Recovery solutions, powered by industry leader Veeam, protects data across your entire IT environment. Delivered as a managed service, Blue Mantis Backup and Recovery integrates seamlessly with your IT processes. From on-prem PCs to cloud servers and remote mobile devices, we can safely backup your precious business data no matter where it resides.

Create immutable backups for your data and applications, stored in a secure cloud data center. Copies are stored on redundant servers with encryption and can be restored in minutes to ensure your employees stay productive.

Learn how you can save on backup plus full managed detection and response services with a Blue Mantis Cybersecurity Bundle.

Customized to your business needs

Blue Mantis professional services design Backup and Recovery solutions to match your desired business outcomes for data protection. We work with your IT to create automated backup plans for physical, virtual, and cloud machines. Gain the resiliency your business needs against cyberattacks and other disasters that can damage your data—and your reputation.
