Carrier Services

Get out of the telecom management game (and get back to growing your business)

For you to accomplish the digital transformation needed to modernize your business, a team of telecom, networking, and communications experts is needed to advise which providers meet your needs—and ensure you're not paying too much.

Blue Mantis Carrier Services help remove the hassles of finding and managing all these services so you can focus on your own business.

A trusted partner for telecom and more

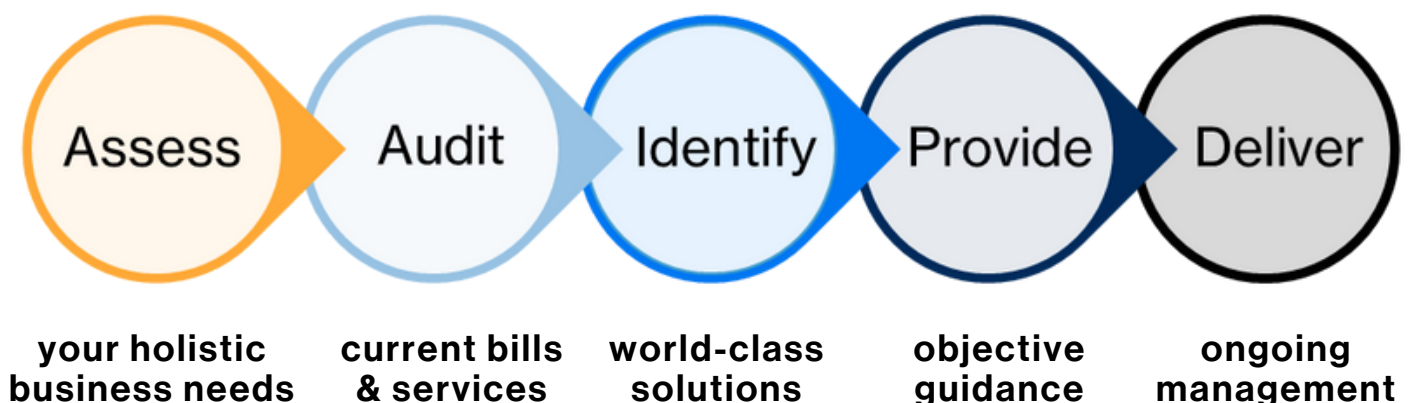

Blue Mantis provides you with an objective expert analysis of what you need to meet your desired business objectives. With over 30 years in the business, we have established extensive partnerships with over 200 major telecom carriers, enterprise-grade secure datacenters, bandwidth aggregators, unified communications and business voice providers, and the top cloud infrastructure services.

We act as an independent auditor and advisor for your business to find the best services at the best prices. Choose from a wide array of Blue Mantis FinOps and full technology expense management solutions that can save you up to 30% on your cloud-first IT costs.

Benefits

- Modernize your IT with managed services from Blue Mantis' massive portfolio of 200+ technology providers
- Reduce IT costs by up to 30% with no-hassle turnkey cloud, telecom, and mobility solutions
- Simplify complex multi-vendor IT environments with dedicated service and support

Enable a cost-effective digital transformation with Blue Mantis
