

# FinOps & Cost Optimization Bundles

## Prioritize and optimize your IT spend

Forrester's 2024 Planning Guides recommend that IT leaders shift away from redundant cloud environments and tools. But how do you know which of your organization's IT resources are safe to remove without sacrificing business productivity?

## Unlock your hidden IT budget dollars

Be confident you are spending only on necessary operations while funding revenue-generating IT initiatives. Blue Mantis FinOps and Cloud Cost Optimization bundles help visualize and track your cloud and telecom spending. We empower everyone in IT, Finance, and the C-suite with the accurate real-time spending data they need to make strategic budgeting decisions for your business.

## Consolidate cloud & telecom spending

Many companies have experienced "cloud sprawl" over the past few years. Our FinOps solution proactively monitors usage of Amazon, Microsoft, and hundreds of other cloud providers. Combined with automated telecom expense management (TEM) and affordable business voice plans, Blue Mantis provides your IT and Finance teams with actionable ways you can consolidate your cloud IT and telecom vendor budgets.

## Tiered bundle options to match your desired business outcomes

Blue Mantis FinOps and Cloud Cost Optimization bundles are offered in two tiers to match your business needs and budget:

### Recession proof your business

- Reallocate and consolidate your IT vendors to optimize budgets
- Visualize all cloud, telecom, and other expenses to maximize your spending
- Accelerate your digital transformation and business growth

Bundle tier	What's included	Cost efficiency
Standard	 Cloud FinOps  Voice Plans	Highly affordable
Premium	 Cloud FinOps  Voice Plans  TEM	Best value
