T·· T-MOBILE FOR BUSINESS

T-MOBILE MULTILINE

T-Mobile MultiLine is a dedicated, network-integrated business communication solution with key compliance features supporting voice, SMS, and common messaging apps.

COMMUNICATE COMPLIANTLY.

Relationships between your employees and their clients keep your business moving, but mobile security and compliance requirements continually evolve, especially in regulated industries.

Designed for compliance

T-Mobile MultiLine helps ensure your organization stays compliant with communication regulations while you provide clients the support they need. Our solution allows companies to meet communication requirements in finance (SEC, FINRA) and healthcare (HIPAA), as well as attorney/client requirements for reasonable effort to capture pertinent electronic records.

Convenient for employees

T-Mobile MultiLine lets your employees call, text, and WhatsApp—all from one app. Features such as automated customer consent capture and intelligent, real-time redaction of sensitive information[1] take complex requirements off the end-user's plate.

Easily scalable

With this enterprise-grade application, users can enroll their devices in minutes. T-Mobile MultiLine works on smartphones regardless of carrier and over Wi-Fi connections.

Simple to manage

A web-based admin portal provides IT leaders detailed usage analytics and ability to manage users, numbers, and policy settings. Integrate with leading CRM[2], UEM, and archival tools.

READY TO INTEGRATE
WITH YOUR WORKFLOWS.

T-Mobile MultiLine helps organizations reach their compliance goals with optional integrations[2] for messaging, collaboration, account management, and more.

Enhance productivity

Empower user productivity while staying compliant with SMS messaging support in **Microsoft Teams**

Use familiar tools

Clients and employees can communicate flexibly and compliantly via calling, texting, **WhatsApp,** and other popular messaging applications

Drive relationships

Promote continuity of service with **Salesforce** integration—employees can take, make, and log calls right from the account page

Simplify management

Take advantage of simple management with powerful UEM integration and deployment options through **Microsoft Intune** or **Blackberry Dynamics**
