

Managed AI Copilot Solutions

Unleash the Generative Enterprise

Recent surveys show 79% of employees using Microsoft Copilot generative AI (genAI) tools are more productive. However, there are significant challenges companies wanting to integrate genAI into their workflows must face due to the technical complexities of customizing Copilot AI for their specific industry and data security needs.

Blue Mantis helps overcome these challenges with a customized turnkey Microsoft Copilot-based AI solution that encompasses executive education, strategic planning, and managed services—everything you need to empower your business teams to harness the full potential of genAI.

Powered by

Unlock your team's productivity

Blue Mantis and AI Technology Partners assesses, modernizes, and manages genAI solutions to enhance your business productivity across three core areas:

1. Strategic operational planning: We provide executive education, business alignment, use case identification and selection workshops for solution roll-out and adoption.
2. Custom genAI deployments: Modular and customizable Copilot solutions are designed to improve operational efficiency and foster innovation across all business functions.
3. Comprehensive managed services: Your genAI solutions are maintained, updated, and optimized continuously. This includes day-to-day operational management, scalability planning, performance monitoring, and strategic reviews to adapt to evolving business needs and technologies.

Examples of pre-built AI solutions

- Sales: Generate detailed RFPs and customer SOWs
- Marketing: Create content and competitive intel reports
- Operations: Simplify IT support and incident management
- HR: Manage leave and other employee entitlements
- Procurement: Assess vendor contracts and supply chains

Benefits

Use AI strategically

Align generative AI projects with your company's broader objectives to maximize impact.

Keep your data secure

Deploy generative AI securely, ensuring compliance to both internal and external data protection demands.

Boost efficiency

Increase business productivity and innovation to secure a competitive edge in rapidly evolving markets.
