Managed Backup as a Service

Secure and scalable data protection

No matter where you store data—whether it's on-prem, in the cloud, or a little of both—your data is vulnerable to ransomware, hardware failures, and other threats. The more data you have just increases the potential for a catastrophe. Without a reliable backup and recovery solution, you risk losing valuable data and facing costly downtime, reputational damage, and regulatory fines.

Blue Mantis Managed Backup as a Service (BaaS) is a turnkey, fully managed solution that provides secure and scalable cloud backup and recovery across your IT estate's physical, virtual, public cloud, and Microsoft 365 workloads.

Hassle-free managed backup

Powered by industry-leaders HYCU, Veeam, and Wasabi, our Managed BaaS solution combines cutting-edge technology and operational practices to ensure your data is verifiably protected and always readily available.

Choose Blue Mantis Managed Backup as a Service to:

- **Enhance your data security and compliance:** Managed BaaS encrypts your data both at rest and in transit, then stores it in highly secure and geographically diverse data centers that comply with your specific industry's standards and regulations.
- **Improve your operational efficiency and agility:** Managed BaaS helps streamline your backup and recovery processes, automate your workflows, and scale your storage capacity on demand, delivered as a service and without any costly hardware or software maintenance or upgrades.
- **Achieve peace of mind:** You can recover your data quickly and easily, whether it's a ransomware attack, a server failure, or other threat to your business data. Managed BaaS enables fast VM recovery, file-level recovery, or application-item recovery, to minimize your downtime and data loss.

Benefits

- Maximize your existing investments by bringing your own HYCU, Veeam, and Wasabi or let us design a custom solution.
- Enable local storage for your critical workloads and immutable cloud storage for offsite data with no ingress, egress, or other hidden costs.
- Simplify your data protection with Blue Mantis as your single point of contact for backup and recovery service.
