

BCDR & Crisis Management Workshop

Strengthen Your Business Resilience

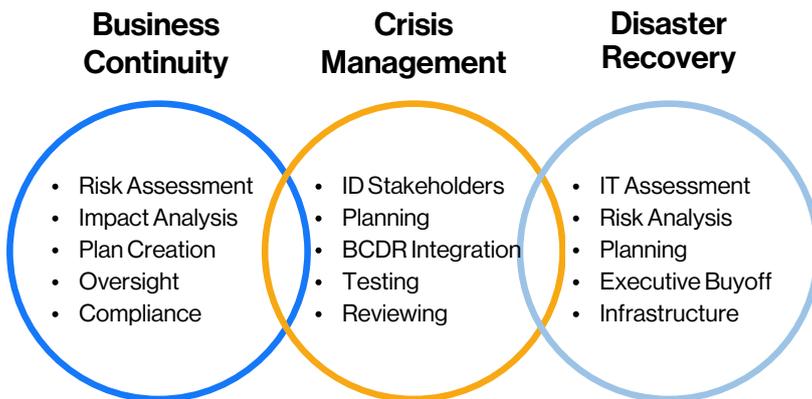

Organizations not focused on business resiliency plans face misaligned strategies, slow recovery times, and operational disruptions during crises. Inadequate risk management, unclear communication protocols, and inconsistent recovery objectives hinder response efforts. These gaps increase downtime, escalate costs, and damage stakeholder trust, leaving the organization vulnerable to financial, reputational, and compliance risks while struggling to maintain operational stability in the face of disruptions.

Reduce Risks and Align to Goals

The Blue Mantis Business Continuity, Crisis Management, and Disaster Recovery Workshop is a half-day engagement to help you achieve business resilience. Align resilience strategies with your organizational goals to enable business continuity (BC), crisis management, and disaster recovery (DR). Evaluate your readiness across 23 key disciplines, including risk management, communication, and IT infrastructure. Receive actionable steps and a maturity benchmark to facilitate accelerated resiliency improvements.

Benefits

- Evaluate readiness across 23 critical disciplines, including risk management, BCP, DR and IT infrastructure, to identify strengths and gaps.
- Receive customized recommendations to improve the strategy and maturity benchmarks aligned with enabling accelerated improvements in resilience.
- Build a foundation in business continuity, crisis management, and disaster recovery to provide swift recovery and long-term success during disruptions.

Boost your business resilience with tailored recommendation, discipline readiness, and actionable next steps.

”
96%
of organizations
suffered disruption in
the past two years.”
