Colocation Half-Day Workshop

Benefits

- Build a strong foundation with essential colocation principles to provide minimal disruption and maximum efficiency during the migration.

- Evaluate current capabilities across 20 key disciplines to identify strengths and improvement areas for a successful transition.

- Receive customized recommendations and a maturity benchmark to optimize migration processes for long-term operational success.

Streamline Colocation Migration

Organizations pursuing a data center colocation initiative face challenges such as selecting the right provider, ensuring seamless integration with existing infrastructure, and managing costs. Security and compliance risks may also arise without clear governance.

This Blue Mantis workshop educates teams on colocation migration principles, assesses capabilities across key domains, and delivers tailored, actionable recommendations to optimize migration, reduce risks, and provide operational success.
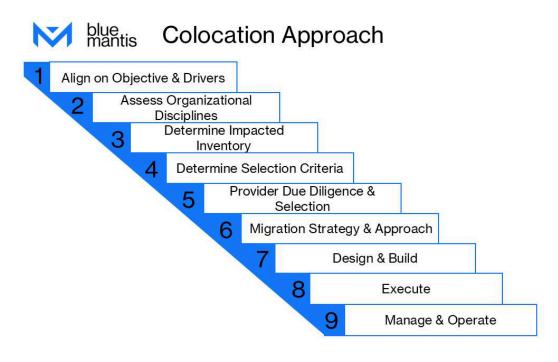

Optimize Your Migration Strategy

The Blue Mantis Colocation Migration Strategy Workshop equips IT leaders with the insight to seamlessly transition infrastructure to a colocation environment. The workshop provides foundational education on migration principles, assesses organizational readiness across 20 critical disciplines, and delivers tailored, actionable recommendations. IT executives gain strategic insights to optimize migration, minimize risks, and achieve long-term operational success.
