FinOps Half-Day Workshop

Benefits

- Build a strong foundation in FinOps principles to align your cloud operations with financial management goals.
- Assess capabilities across 20 key disciplines to identify strengths and areas for improvement.
- Receive tailored recommendations to optimize hybrid cloud financial management and achieve sustainable operational efficiency.

Adopt FinOps, Optimize Costs

Without a financial operations (FinOps) practice, organizations are challenged to manage dynamic operational expenses (OPEX) costs effectively, leading to overspending and budget inefficiencies. Limited visibility into hybrid cloud usage and costs hampers accountability and decision-making.

The Blue Mantis FinOps Workshop educates teams, discovers readiness, and delivers actionable recommendations to optimize cloud financial management and drive financial accountability in hybrid-cloud operations.

Optimize Financial Management

The FinOps Workshop equips IT leaders with the tools to align cloud operations with financial management goals. The workshop combines foundational education in FinOps principles with a detailed assessment of your organization's capabilities across 20 key disciplines, including IT sustainability and infrastructure automation. You gain recommendations with actionable steps to optimize cloud financial management, drive accountability, and achieve sustainable operational efficiency.
