# Hybrid Cloud Half-Day Workshop

Benefits

- Build foundational knowledge in hybrid cloud strategies to align IT operations with your business goals.

- Assess capabilities across 25 critical disciplines to identify strengths and improvement opportunities for adoption.

- Receive tailored recommendations to optimize performance, integrate systems, and achieve sustainable operational efficiency.
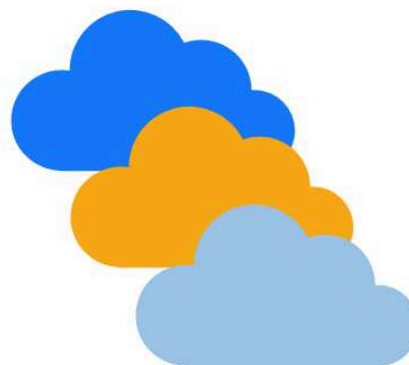

Streamline Hybrid Cloud Adoption

Organizations adopting hybrid cloud face challenges such as integrating on-premises and cloud systems seamlessly, managing data movement, and providing consistent security policies across environments. Cost control can become complex without clear visibility into usage.

The Blue Mantis Hybrid Cloud Workshop educates teams, assesses capabilities, and delivers actionable steps to effectively start your hybrid cloud adoption strategy.

Optimize Your Hybrid Cloud Strategy

The Blue Mantis Hybrid Cloud Adoption Half-Day Workshop provides IT leaders with the tools to align cloud strategies with business goals. This workshop combines foundational education in hybrid cloud principles with a comprehensive assessment across 25 key disciplines, including cost optimization and infrastructure automation. You get recommendations from our strategic advisory services experts on actionable steps to enhance integration, optimize performance, and achieve sustainable operational efficiency.

CloudOps Infrastructure Automation

Key Principles
- Immutable Infrastructure
- Version Control
- Image Lifecycle Mgmt.
- Automation
- Idempotency
- Testing and Validation
- Modularity & Reusability
- Monitoring & Logging
- Drift Detection & Correction
- Policy as Code
- Security
