WHY UPGRADE YOUR CYBERSECURITY WITH BITDEFENDER?

GRAVITYZONE ENTERPRISE

Industry-Leading Endpoint Protection and Risk Analytics That Also Includes:

Integrated Endpoint Detection and Response (EDR):

GravityZone Business Security Enterprise combines the world's most effective endpoint protection platform with Endpoint Detection and Response (EDR) capabilities. Enhanced threat detection with comprehensive search capabilities for specific indicators of compromise (IoCs), MITRE ATT&CK techniques, and other artifacts to discover early-stage attacks.

Cross-Endpoint Correlation:

Takes threat detection and visibility to a new level by applying XDR capabilities for detecting advanced attacks across multiple endpoints in hybrid infrastructures (workstations, servers, and containers, running various OS).

Focused Investigation and Response:

Organizational-level incident visualizations enable you to respond efficiently, limit the lateral spread, and stop ongoing attacks.

Extended Incidents/Incident Advisor:

Security teams of any size and skillset are able to view threat detections, understand impact to operations and take recommended actions to contain or eliminate threats from a single view, greatly increasing efficiency. It displays all the complex incidents detected at global level in your environment, that may affect your entire network.

Extended Detection & Response (XDR):

Receive full XDR capabilities by purchasing Add-On XDR Sensors (Cloud, Identity, Network, Productivity).

MANAGED DETECTION AND RESPONSE

Attackers work around the clock. And so do we.

Bitdefender MDR service provides 24x7 defense against cyber threats delivered through our global SOCs.

GRAVITYZONE ADD-ONS

Patch Management: Strengthen security and reduce the risk of potential vulnerabilities in software, operating systems and applications with automated patch management.

Full Disk Encryption: Centralized handling of the native device encryption mechanisms provided by Windows (BitLocker) and Mac (FileVault and the diskutil command-line utility) to ensure optimal compatibility and performance.

Security for Email: Multi-layered, cloud-based email security. Supports hybrid environments using Exchange on-premises, Microsoft365, Exchange Online, or Gmail.

Security for Storage: Delivers proven protection for ICAP-compatible file-sharing and network storage systems that is easy to manage.

Mobile Threat Defense: Gain insight into mobile device footprints to prevent and protect against attacks and integrate mobile devices into overall security structures.

Container Security: Provides Antimalware / Anti-Exploit / EDR capabilities for Linux based Container workloads.

Integrity Monitoring: Ensure compliance and regulatory security standards by monitoring the integrity of entities and users throughout your organization.

GravityZone Data Retention (30/90/180 days): EDR Raw Data retention. Needed for compliance / historical search / threat hunting.

XDR Sensor Identity (Local Active Directory / Azure AD / MS Intune): Collects and processes user login information.

XDR Sensor Network: Providing insights and detections on the network.

XDR Sensor Productivity (O365/Google Workspace): Collects and pre-processes data for email, user activity and other services.

XDR Sensor Cloud: (AWS/Azure): Collects and processes information about configuration changes and user activity.

Proactive Hardening Attack Surface Reduction (PHASR): A revolutionary, AI-powered cybersecurity solution that redefines how organizations protect their digital environments.

GRAVITYZONE CSPM+
Going Beyond Cloud Security Posture Management

With GravityZone CSPM+, your overburdened teams, which are already stretched across multiple operations and security areas of expertise, can embrace cloud with confidence. CSPM+ provides visibility into your cloud footprint and automatically identifies configurations which are outside of compliance frameworks and best practices.

Going beyond standard Cloud Security Posture Management (CSPM), GravityZone CSPM+ also finds and maps over-privileged identities with Cloud Infrastructure Entitlement Management (CIEM). Finally, CSPM+ includes Threat Detection to alert your team to potential security issues to protect your cloud investment.

Cloud Risk Visibility

Inventory your cloud assets, find and prioritize miscon-figurations and over privileged identities to lower your risk.

Compliance Mapping

Eliminate high-effort manual efforts to quickly surface problematic configurations based on your compliance needs.

Threat Detection and Response

Detect threats and leverage actionable, human-readable outcomes in the graphical Incident Advisor.

- Visibility into your cloud platform
- Resolve misconfigurations
- Accelerate compliance
- Uncover risky identities

PROACTIVE HARDENING ATTACK SURFACE REDUCTION (PHASR)
Not Just A Tool — A Strategic Advantage

Uncover unused risky binaries and applications, restrict access to them, and cut your attack surface by up to 95%.

- Reduce Attack Surface by Up to 95%
- Enhance Efficiency, Reduce Alert Fatigue
- Move Beyond Static Defenses
- Proven Results from Early Access
  - Quantifiably reduced risk
  - Disrupted attack kill chains
  - Proactive security posture

ADVANCED THREAT INTELLIGENCE
Unique, Highly Curated and Enriched Intelligence

Bitdefender delivers accurate intelligence with value-added contextual insights focused on attack information.

The threat data is collected from its global network of hundreds of millions of sensors, as well as the technology licensing ecosystem, the Network Sandbox Analyser, cyber-security partners, plus global law enforcement agencies and turned into actionable insights — enabling customers to understand and respond to security threats even before they emerge.

Effective Alert Triage

Determine the severity of a cyber threat by prioritizing the stream of alerts and accurately differentiate between benign and dangerous situations.

Accelerated Incident Response

Enhance incident response and forensic capabilities to mitigate the latest sophisticated threats for your organization.

Proactively Uncover Attacks

Empower threat hunt missions with accurate, detailed sources of information on the threat actors most likely to penetrate your business environment.

- Unique insights into the latest threats
- Quality sourced for accurate intelligence
- Cyber-threat intelligence expertise
- Actionable threat intelligence at hand
- Robust integration ecosystem

GRAVITYZONE COMPLIANCE MANAGER
Monitor Your Security Posture Against Your Compliance Standards

Fully integrated, it minimizes the need for extensive resources by proactively identifying compliance gaps — and helps in fixing them with a click of a button. Unifies security, risk, and compliance management to effectively mitigate risk, save time and boost your organization's resilience, without the complexity.

- Centralized reporting to address inefficiencies
- Reduces time-to-compliance & aids audit preparation
- Spans cloud and on-prem IT environments
