

Blue Mantis Protect combines advanced AI technology with decades of human expertise to safeguard your business – 24/7/365. Designed for the unique needs of mid-sized organizations, it delivers complete threat detection, response, and compliance in one fully managed service.

You get a full suite of cybersecurity tools and services with AI-enhanced threat detection and response built on a world-class cloud platform for a fraction of the cost of building and staffing your own in-house security operations center.

Blue Mantis Protect Solutions

Mantis Protect is a fully managed service delivering 24/7/365 cybersecurity threat detection, analysis, and mitigation. We act as an extension of your IT team to solve your business' unique cybersecurity challenges with:

Solution	What It Does for You
Managed Detection and Response	Around-the-clock AI-powered monitoring and live experts neutralize threats before they impact your business.
Managed Endpoint Protection	Every device – on-site or remote – is continuously protected with custom policies that adapt to evolving risks.
Managed Email Security	Block phishing, malware, and account takeovers before they ever reach your inbox.
Managed Cloud Native Application Protection Platform (CNAPP)	Full visibility into cloud risks – across AWS, Azure, GCP, and Kubernetes – so you can innovate with confidence.
Managed Secure Service Edge (SSE)	Enforce zero-trust access and keep remote workforces secure, without slowing productivity.
Threat Hunting	Proactive investigations uncover stealthy, hidden threats long before they can disrupt operations.
Vulnerability Management	Pinpoint and prioritize weaknesses in apps, devices, and networks, then get a clear plan to fix them fast.
Dark Web Monitoring	Discover stolen credentials and sensitive data for sale online, before attackers can use them against you.
GRC as a Service	Offload compliance headaches with ongoing policy enforcement and audit-ready reporting.

Managed Detection & Response (MDR) with Threat Hunting

Mantis Protect delivers 24/7/365 managed detection and response (MDR) with built-in threat hunting that's powered by AI and backed by expert analysts. Designed specifically for mid-sized businesses, it seamlessly augments your existing IT team to help you stop threats before they cause damage.

Proactive protection across all endpoints, apps, and identities

AI-driven analytics plus human threat hunters to detect subtle behavioral anomalies

Built on the cloud-native Gurucul platform, recognized by Gartner as a Visionary in SIEM

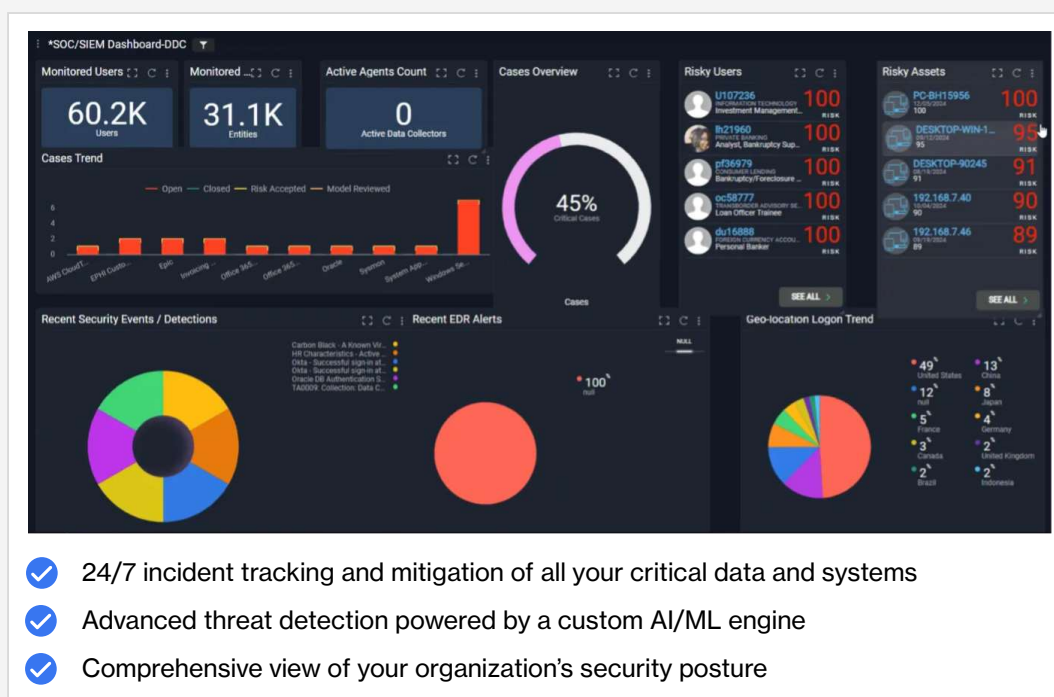

Scales dynamically across on-prem, cloud, and hybrid environments

Real-time dashboards and executive reporting keep leadership informed

With over 2,000 machine learning models continuously scanning your environment, Mantis Protect finds what traditional tools miss and responds with the speed you need.

Dark Web Monitoring

Protect your business before stolen data can be used against you.

Mantis Protect continuously scans the dark web – including Tor, Telegram, and I2P – for leaked credentials, compromised assets, and third-party data exposures tied to your organization.

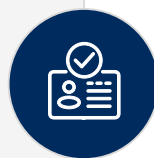

Scans 3.5 million daily events
to detect hidden threats

**AI-powered detection
and prioritization** of
high-risk findings

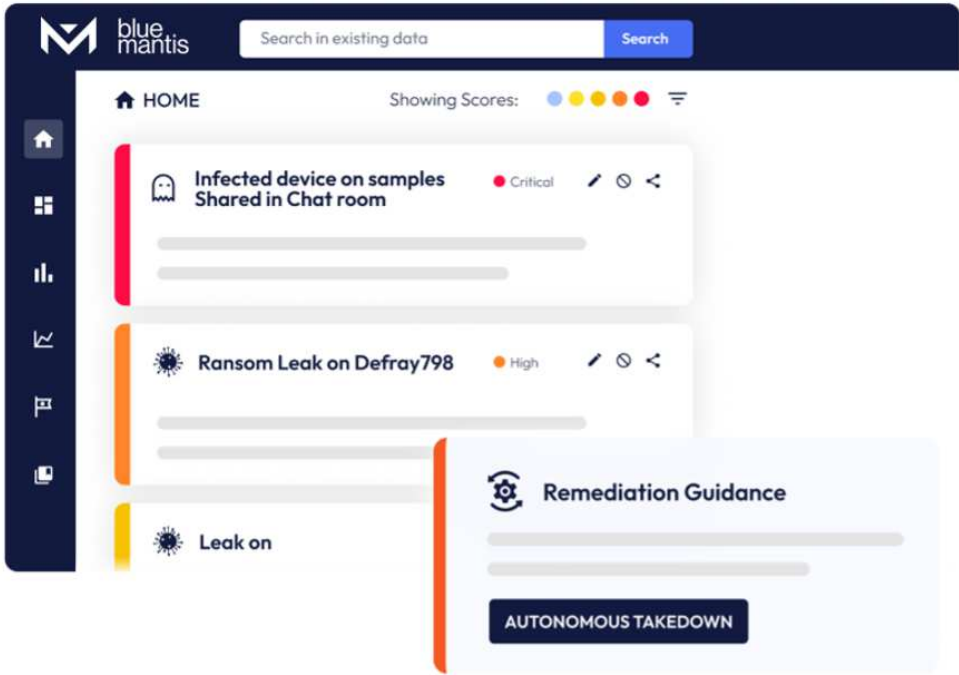

Real-time dashboards
provide visibility into
threat exposure and
compliance posture

**Helps proactively contain
identity-related risks**
before attackers can act

With automated alerts and expert analysis, Mantis Protect enables faster mitigation and smarter decision-making.

The screenshot displays the Mantis Protect dashboard interface. At the top, there is a search bar labeled "Search in existing data" with a "Search" button. Below this, the "HOME" section shows a list of alerts. The first alert is "Infected device on samples Shared in Chat room" with a "Critical" severity level. The second alert is "Ransom Leak on Defray798" with a "High" severity level. The third alert is "Leak on" with a "Medium" severity level. A "Remediation Guidance" panel is visible on the right, featuring an "AUTONOMOUS TAKEDOWN" button. A sidebar on the left contains navigation icons for home, dashboard, alerts, reports, and settings.

- ✓ AI-powered threat intelligence monitoring 3.5M daily events
- ✓ Detects when your sensitive information has been compromised
- ✓ Reduces your risk exposure with proactive mitigation of threats

Vulnerability Management

Mantis Protect helps you stay ahead of threats with continuous, AI-enhanced vulnerability scanning across your entire IT environment – on-prem or in the cloud.

Prioritizes vulnerabilities by actual business risk, not just severity

Draws from 25+ real-time threat intelligence sources

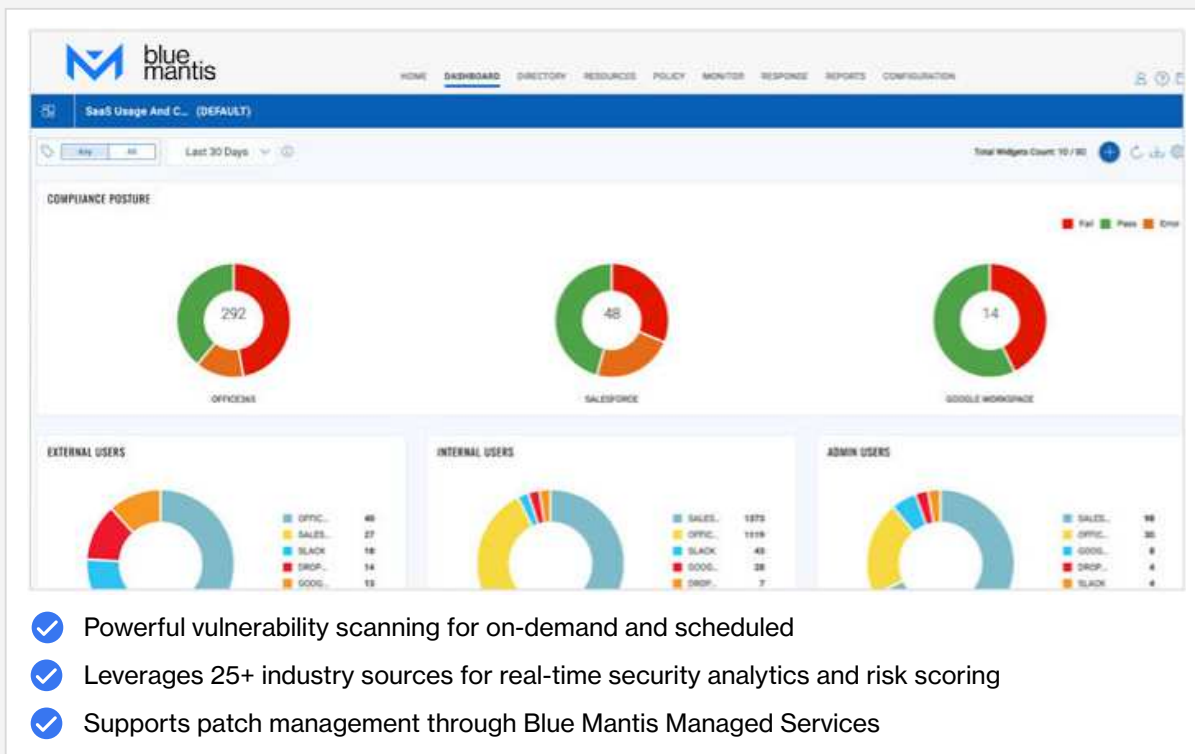

Supports **zero-day detection, MITRE ATT&CK mapping**, and scheduled or on-demand scans

Optional patching services via Blue Mantis Digital Ops let your IT team focus on innovation – not maintenance

Whether you're protecting workstations, servers, or SaaS apps, Mantis Protect ensures you're not just finding vulnerabilities – you're fixing them, fast.

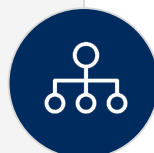

GRC as a Service

Take the complexity out of compliance.

With Governance, Risk and Compliance (GRC) as a Service in Mantis Protect, you can offload the heavy lifting of policy enforcement, risk assessment, and regulatory alignment without adding tech or headcount.

Real-time risk auditing
across vendors, hybrid cloud,
and internal systems

Aligns with **NIST CSF 2.0**
and other frameworks to
ensure compliance

Supports mandates like
PCI DSS, HIPAA, and more

**Clear ownership and
accountability** across
departments

Backed by **decades of
industry-specific expertise**

From documentation to incident response plans, we help you streamline every part of your GRC program, so you can focus on strategy, not red tape.

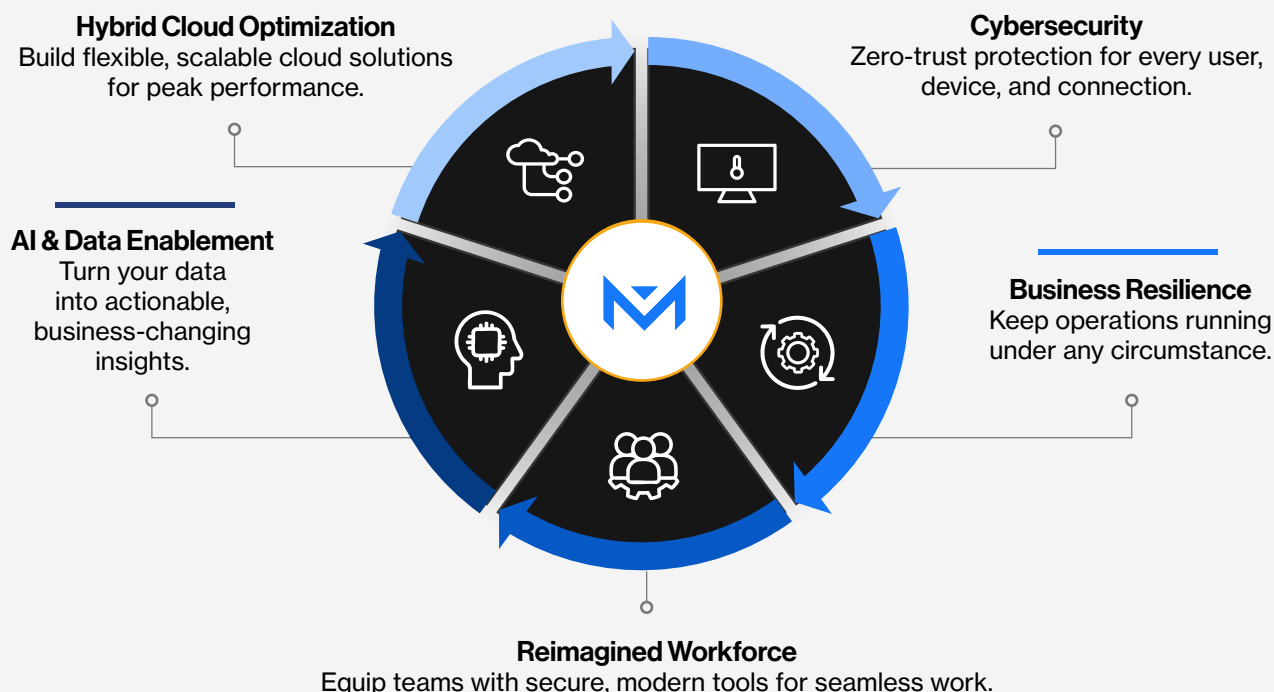

- ✓ Offload your GRC tasks to a dedicated partner experienced in your industry's specific requirements
- ✓ Assess your potential risks due to regulatory updates, internal/external threats, and more
- ✓ Eliminate upfront investments in technology or staff while ensuring you are always audit-ready

Why Blue Mantis Protect?

Mantis Protect delivers a concierge-level cybersecurity experience for midmarket businesses – built on zero-trust principles, powered by AI, and backed by 30+ years of expertise. We unify protection, compliance, and performance so you can focus on growth while we safeguard your people, data, and operations at a fraction of the cost of building in-house capabilities.

Our Five Strategic Pillars

Mantis Protect Solution Options

Our solutions are delivered as customizable managed service packages that scale with your business needs:

Proactive and Predictive Security	Services Delivered				
	Unified Complete	Threat Hunting	Pen Testing	Managed GRC	vCISO
Proactive Complete	✓	✓	✓	✓	✓
Proactive Protect	✓			✓	✓
Proactive Detect	✓	✓	✓		
Unified Services	Services Delivered				
	Baseline Complete	MDR	Dark Web	Vulnerability Management	Microsoft 365 Tenant Security
Unified Complete	✓	✓	✓	✓	✓
Unified Protect	✓			✓	✓
Unified Detect	✓	✓	✓		
Baseline Protection	Services Delivered				
	Email Security	EDR	XDR	MFA	User Awareness
Baseline Complete	✓	✓	✓	✓	✓
